<sup>1</sup> Under the Revenue Act of 1916 and subsequent acts the personal exemption allowed to married persons was also allowed to heads of families.

<sup>2</sup> For individuals with net income in excess of \$5,000 the personal exemption is \$2,000.

<sup>3</sup> For the calendar years 1919 and 1920 the normal tax rates were 4% on the first \$4,000 of normal tax net income and 8% on the balance of such net income over \$4,000.

<sup>4</sup> Tax for 1923 reduced 25% by credit or refund under section 1200 (a), Revenue Act of 1924.

<sup>5</sup> For calendar years 1922 and 1923.

<sup>6</sup> Under the acts of 1924 to 1928 the credit was against tax; under the act of 1932 no credit was allowed for the years 1932 and 1933; and under the 1934 and subsequent acts the credit is against net income. In the 1924 act the credit was limited to 25% of normal tax on ordinary net income and in the 1926 and 1928 acts to the sum of 25% of normal tax on ordinary net income and 25% of surtax on earned net income. The amount of net income accounted as earned income for purposes of the earned income credit is as follows: Under the 1924 act all net income up to \$5,000, whether earned or not, and up to \$10,000, if earned; under the 1926 act all net income up to \$5,000, whether earned or not, and up to \$20,000, if earned; under the 1928 act all net income up to \$5,000, whether earned or not, and up to \$30,000, if earned; under the 1934 and subsequent acts all net income up to \$3,000, whether earned or not, and up to \$14,000, if earned. A maximum of 20% of net profit from trade or business involving personal services may be included within the earned income category.

<sup>7</sup> Rates for 1929 reduced to 1½%, 2%, and 4%, respectively.

<sup>8</sup> In the case of compensation (a) received for personal services rendered by an individual in his individual capacity, or as a member of a partnership, and covering a period of five calendar years or more from the beginning to the completion of such services (b) paid (or not less than 95% of which is paid) only on the completion of such services, and (c) required to be included in gross income of such individual for any taxable year beginning after December 31, 1938, the tax attributable to such compensation shall not be greater than the aggregate of taxes which would have been paid had the income been received in equal portions in each of the years in the period.

<sup>9</sup> For taxable years beginning after December 31, 1939, and before January 1, 1945, the sum of the normal tax and surtax computed under the above rates shall be increased by a defense tax of 10% of the amount of the tax, limited, however, to 10% of the excess of the net income over the sum of the normal and surtax.

<sup>10</sup> While the minimum and maximum surtax rates have not been changed, the surtaxes have been increased on surtax net incomes in excess of \$6,000 and not in excess of \$100,000. From that point the rates of section 12 (b) I. R. C. are retained.

<sup>11</sup> An excise tax of 5% was imposed by section 213 of the National Industrial Recovery Act, effective on dividends declared between June 16, 1933, and December 31, 1933 (or in the case of taxpayers on a fiscal-year basis, dividends declared until the end of the fiscal year 1933). Under the Revenue Acts of 1928 and 1932 the exemption applied to dividends received from domestic and certain foreign corporations; under the Revenue Act of 1934 the exemption applied only to dividends received from domestic corporations.

<sup>12</sup> In addition to the Revenue Act of 1943, the Congress enacted the Current Tax Payment Act of 1943, which revised the system of individual income-tax payment but made no change in the rates, exemptions, and credits. The act provided for current collection of tax liability by collection at source, and by filing of declarations of estimated tax and the current payment of

such tax by taxpayers not made substantially current in their payments through withholding. To provide for transition to current payments, the act in general canceled 75% of either the 1942 or 1943 tax, whichever was the lesser.

<sup>13</sup> Individual Income Tax Act of 1944.

<sup>14</sup> Subsequent to the act of Oct. 22, 1914, and prior to the Individual Income Tax Act of 1944, the personal exemption allowed to married persons was also allowed to heads of families.

<sup>15</sup> The changes in individual income-tax exemptions and rates made by the Revenue Act of 1943, intended to be applicable to the taxable year 1944, were superseded by the provisions of the Individual Income Tax Act of 1944 before they became effective.

<sup>16</sup> Surtax exemptions. For surtax, each taxpayer was allowed an exemption of \$500, plus \$500 for his spouse and \$500 for each dependent. The normal tax exemption was \$300. However, if husband and wife combined their income in a joint return, the normal tax exemption was \$500 plus the amount of the smaller of the two incomes, but not more than \$1,000 for both.

<sup>17</sup> For 1946 and subsequent years, the exemptions are allowed for both normal tax and surtax. Beginning with the taxable year 1948 married couples filing joint returns were allowed to divide their combined incomes equally in computing their income taxes.

<sup>18</sup> The Individual Income Tax Act of 1944 eliminated the former requirement that a "dependent" must be under 18 years old or incapable of self-support. Under the 1944 act the taxpayer may claim as a dependent any close relative whose income is less than \$500 and who received more than half of his support from the taxpayer, provided the relative is a resident of the United States, Canada, or Mexico.

<sup>19</sup> Allowed to taxpayers and their spouses, but not allowed for dependents.

<sup>20</sup> The additional exemption of \$600 for the blind replaced the special \$500 deduction for the blind provided by the Revenue Act of 1943, applicable to taxable years 1944-47.

<sup>21</sup> The percentage reductions from tentative tax were eliminated for calendar year 1951 and other taxable years beginning after Sept. 30, 1950. For calendar year 1950 the percentage reductions from tentative tax were reduced to the following: 13% on the first \$400 of tentative tax; 9% on the next \$99,600; and 7.5% on the amount in excess of \$100,000.

<sup>22</sup> The combined normal tax and surtax (before deduction of credits for foreign taxes, taxes withheld at source, and taxes withheld on wages) is subject to the following maximum effective rate limitations: Revenue Act of 1944, 90%; Revenue Act of 1945, 85.5%; Revenue Act of 1948, 77%; Revenue Act of 1950, for calendar year 1950, 80%, for calendar year 1951 and other taxable years beginning after Sept. 30, 1950, 87%.

<sup>23</sup> Applicable to taxable year 1943 only. The exemption of \$624 applied to every individual regardless of marital status. However, in the case of a husband and wife filing a joint return, if the Victory tax net income of one spouse was less than \$624, the total exemption was limited to \$624 plus the Victory tax net income of such spouse. The following credits were allowed against the tax: 25% of the tax if single or 40% if married, plus in either case 2% for each dependent. The amount of the credits were limited, however, to \$500 if single, \$1,000 if married, plus \$100 for each dependent. The credits as provided by the Revenue Act of 1942 were to be postwar credits, allowable currently only under specified conditions, but they were converted into automatic current credits by Public Law 178, 78th Congress, approved Oct. 28, 1943. The amount of Victory tax (before tax credits) was limited to the excess of 90% of net income over the regular income tax liability.

<sup>1</sup> Estimates of the Treasury Department.  
<sup>2</sup> Estimates of the staff of the Joint Committee on Internal Revenue Taxation.  
<sup>3</sup> Estimates of the Treasury Department. Assuming the 4 percentage point increase in rates proposed by the Secretary of the Treasury were adopted effective July 1, 1951, individual income tax collections in the fiscal year 1952 would amount to \$31.3 billion. If the corporate income and capital gains proposals became effective Jan. 1, 1951, and the excise tax proposals became effective July 1, 1951, total internal revenue collections would amount to \$71.7 billion. Thus, under the Secretary's proposals, individual income tax collections would still account for 43.7 percent of total internal revenue collections in the fiscal year 1952.

\*Less than 50 cents.

<sup>1</sup> Includes defense tax.

<sup>2</sup> Tax liabilities for the years 1942 and 1943 are unadjusted for transition to current-payment basis.

<sup>3</sup> Includes net Victory tax. Computed by assuming that deductions are 10 percent of Victory tax net income; i. e., that Victory tax net income is ten-ninths of selected net income.

<sup>4</sup> Individual Income Tax Act of 1944.

<sup>5</sup> Taking into account the following maximum effective rate limitations: For 1943-45, 90 percent; 1946-47, 85.5 percent; 1948-49, 77 percent; 1950, 80 percent; 1951, 87 percent.

NOTE.—Maximum earned net income assumed. In the case of married persons it is also assumed that only one spouse has income.
